

Wamama Pamoja Enterprise - Support Package Classification

Attention: Leacky Omondi

Subject: Final clarification on Silver Package classification and monthly support coverage

Thank you for the feedback. Based on the completed system audit, Wamama Pamoja Enterprise is now classified under the Silver Package. This is not only because of the number of users, but because of the full operational load the system is now supporting every day.

What Wamama Has Been Enjoying Under the Upgraded Setup

- Improved speed after database optimization and performance indexing.
- Support for savings, repayments, loans, approvals, reports, inventory, orders and staff permissions.
- Duplicate-entry controls, approval workflow improvements, officer permissions and supervisor/team access setup.
- Ongoing troubleshooting, issue fixes, data checks, monthly review and priority WhatsApp support during working hours.

Audit Evidence Supporting the Silver Package

- 12 active business users, excluding Rudder support/test accounts.
- 1,221 active clients and 1,049 active loans currently being managed.
- 4,839 savings entries and 4,885 repayment entries processed in the last 30 days.
- 331 orders created in the last 30 days, meaning the system is also supporting inventory and order operations.
- Multiple roles are actively using the system: admin, branch manager, inventory officer, storekeeper, loan officers and officers.
- Some users have broad permissions across savings, repayments, orders, inventory, suppliers and reports, so the system is supporting several departments, not one user only.

Package Comparison

Package	Fee	Limit	Coverage
Bronze	KES 3,000	Up to 10 users and 1,000 clients.	Light usage, basic support, minor fixes and basic monitoring.
Silver	KES 6,000	10-20 users and 1,000-2,000 clients.	Current Wamama level: performance monitoring, database optimization, backups checks, reports, permissions, approvals, inventory/orders and priority support.
Gold	KES 10,000	20-40 users and 2,000-5,000 clients.	Higher-volume operations, deeper monitoring, advanced reports and faster urgent support.
Enterprise	KES 15,000+	40+ users, 5,000+ clients or branches.	Custom modules, integrations, special reports and dedicated priority support.

Conclusion: Wamama has already exceeded the Bronze Package. The applicable support category is Silver at KES 6,000 per month. The upgraded setup was provided this month as a free observation period; from next month, the account will be maintained under the Silver Package to keep the system stable, fast and properly supported.

Kind regards,
