

Wamama Pamoja Enterprise - Support Package Summary

Attention: Leacky Omondi

Subject: Clarification on current support package and service coverage

Thank you for your response and for requesting clarity before the revised support fee takes effect. We agree that any change in monthly support should be clear, measurable, and connected to the value the system brings to your daily operations.

Based on the current audit, Wamama Pamoja Enterprise now falls under the Silver Package. The system currently has 12 active business users, over 1,200 active clients, over 1,000 active loans, and thousands of savings and repayment entries processed every month.

Simple Package Comparison

Package	Monthly Fee	Best For	What It Covers
Bronze	KES 3,000	Up to 10 users and up to 1,000 clients.	Basic support, minor fixes, light reports support and light monitoring.
Silver	KES 6,000	10 to 20 users and 1,000 to 2,000 clients. This is the current Wamama level.	Performance monitoring, database optimization, backup checks, roles and permissions support, approvals support, reports support and priority WhatsApp support.
Gold	KES 10,000	20 to 40 users and 2,000 to 5,000 clients.	Higher-volume support, deeper monitoring, advanced reports and faster handling of urgent operational issues.
Enterprise	KES 15,000+	More than 40 users, 5,000+ clients, multiple branches or custom workflows.	Custom modules, special reports, advanced permissions, integrations and dedicated priority support arrangement.

The Silver Package is recommended because Wamama has moved beyond the Bronze limits in users, clients, loans and daily transaction volume. This package is meant to keep the system fast, stable and properly maintained as the business continues to grow.

The upgraded setup has been provided this month as a free observation period. If the performance is acceptable during normal operations, the monthly support fee will move to KES 6,000 from next month.

Kind regards,
