

Clarification on the Silver Support Package

Client: Wamama Pamoja Enterprise
 Attention: Leacky Omondi
 Subject: Service commitments, package differences and current usage classification

Dear Leacky, thank you for your thoughtful response. We appreciate your request for transparency before the revised support fee takes effect. Any increase in monthly support should be connected to clear service value, measurable performance, reliability and support responsiveness.

Current Audit Highlights

Package Comparison

Starter	KES 1,000	1-3 users, up to 300 clients	Very light usage and basic WhatsApp support
Bronze	KES 3,000	Up to 10 users, up to 1,000 clients	Basic support, minor fixes and light monitoring
Silver	KES 6,000	10-20 users, 1,000-2,000 clients	Current Wamama fit: optimization, permissions, reports, backup checks and priority support
Gold	KES 10,000	20-40 users, 2,000-5,000 clients	Higher volume, branch-level operations and advanced reporting
Enterprise	KES 15,000+	40+ users or 5,000+ clients	Custom modules, special integrations and dedicated priority support

What the Silver Package Commits To

- Performance:** Ongoing database optimization, index checks, heavy-table monitoring and review of slow areas such as login, client records, transactions and reports.
- Reliability:** Routine checks on savings, repayments, approvals, loans, orders, inventory and reports to reduce disruptions.
- Support Response:** Priority WhatsApp support during working hours. Urgent operational blockers are prioritized first.
- Backups and Data Safety:** Daily backup checks and data consistency support. Platform backup depth depends on the hosting/Supabase plan, and Rudder will advise when higher infrastructure becomes necessary.
- Permissions and Roles:** Support for user roles, permissions, team visibility, supervisor access, officer book transfers and audit trails.
- Monthly Review:** A monthly system health review covering usage growth, performance, pending issues and recommended improvements.

Why Wamama Falls Under Silver

- User load: 12 active business users, already above the Bronze limit.
- Client and loan load: more than 1,200 active clients and more than 1,000 active loans.
- Operational activity: thousands of savings and repayment records, approvals, inventory/order activity and reports every month.

Future Scalability

The Silver Package is suitable for Wamama at the current scale. If the business later grows beyond 20 users, 2,000 clients, multiple branches, or requires major new custom workflows, we would review the package again transparently before any further change is made.

Next Step

We are available to go through this document together and align expectations before the revised fee takes effect. Our goal is to maintain a long-term partnership that supports Wamama Pamoja Enterprise with clarity, fairness and dependable system performance.

Kind regards,

Rudder Research Team
